

I'm not a robot

Mercy Corps works in places characterized by fragility and crisis, where the impacts of shocks and stresses threaten people's lives. As communities confront the increasingly frequent threat of climate-induced disasters and the resulting power outages, there is a growing need for digital readiness. Digital readiness is emerging as a critical factor in how infrastructure systems respond to climate risk and maintain performance.

December 6, 2019 2019 "Fall Undergrad In Sustainable Development Capstone Workshop Final Briefings Client: Westchester" ... AI is everywhere " but what does it actually mean

The Pre-Summit is here and it is your time to join the conversation! Take part in 3 days of bold action to transform ... The Society of American Military Engineers (SAME) NYC Post and USGBC's Middle Atlantic A recent climate change summit in Connecticut is aiming to make the state and
